For high school teachers...

Help your students succeed on the ACT!

Open doors to opportunities for your students... You can change your students' lives.
You can help them gain admission to the college of their dreams & obtain more scholarship money.
Learn how to help them score higher on the ACT!

Embedding ACT-Like Content, Assessment, & Strategies in Daily Classroom Teaching

*A 3-hour class that helps you understand
how to prepare your students for the ACT—
without changing much of what you currently do!*

Almost every Ohio student now takes the ACT. Securing a good score can assure graduation, qualify students for CCP opportunities, &, perhaps, most importantly, help them gain admission to college & obtain essential financial aid.

Often our students don't perform as well on the ACT as they do in the classroom. You can help them improve their scores on the ACT—*without much of an adjustment of how you conduct your daily classes.*

This session helps demystify the ACT by explaining its structure, the academic content covered on it, & testing & time management strategies students can employ to maximize their performance on the test. Then we provide you with specific suggestions—related to content, assessment, & strategies—that you can implement easily so that your students will be best prepared for what they'll see on the test. Each participant gets a comprehensive, 400-page, reference workbook with access to virtually unlimited numbers of sample questions. In addition, participants

- take a timed test so that you understand the time constraints under which students work
- cover a variety of example questions so that you see how students answer various types of questions correctly
- spend group time with colleagues to discuss how to implement/add ACT-style questions into assessments.

You will learn specific, tangible items that you can implement immediately in your daily teaching that will make a real difference for your students. With this professional development, you will be able to answer the questions, "What did I learn? How will it impact my teaching? How will I know I am more successful with my teaching?"

Separate classes for English/Language Arts and Mathematics & Science teachers

"I teach junior level composition & literature. I feel that I will be able to integrate material effectively in both classes to help students.

—AH, 9th & 11th grade English teacher

"In 20 years as an educator, this is the best PD I've ever had!"

—YS, HS testing coordinator

Next Level Prep is Ohio's leader in ACT preparation. We currently work with over 70 high schools & thousands of students (urban, suburban, & small town/rural) around the state. Our typical students see a 2.0 to 2.5 composite point increase on the ACT after taking our student seminars.

Next Level Prep, 1805 O'Brien Rd., Columbus, OH, 43228
